\* "Delightful Decomposers: Adventures Under a Log," is a fun, hands-on program that lets school-age children get dirty while exploring the amazing world of decomposers found inside a decaying log. Children will learn the importance of nature's recycling by insects, fungi, lichens, and more. Children must be accompanied by an adult. Best for school age children 2<sup>nd</sup> grade and up. The program lasts approximately 1-1.5 hours.
